We are pleased to host FAZEEL GAREEBOO, SPEAKING ON:

“AI AND ISLAM: OPPORTUNITIES AND CHALLENGES”

[Noam Chomsky, Steven Spielberg Say AI Is Soulless and Scary²](#)

*Chomsky and Spielberg have both expressed their concerns about the educational, ethical
and existential implications of AI...*

“The crux of machine learning is description and prediction; it does not posit any causal mechanisms or physical laws. Of course, any human-style explanation is not necessarily correct; we are fallible. But this is part of what it means to think: To be right, it must be possible to be wrong. Intelligence consists not only of creative conjectures but also of creative criticism.” Chomsky

**ARE THEY RIGHT?
OR ARE THERE GREAT POTENTIAL OPPORTUNITIES TO BE HARNESSSED?**

About the Talk:

Artificial intelligence (AI) is rapidly changing the world, and Muslims are not immune to its impact. This talk will start with a high-level overview of AI. We then explore the opportunities and challenges that AI presents to Muslims, from the ethical implications of AI-powered decision-making to the potential for AI to be used for good.

About the Speaker:

Fazeel Gareeboo is a computer scientist who has worked in the industry for the last 38 years and is currently with a video game company in the US. He was formerly President of AMR.

The forum meeting is free and aimed at the Alumni, members and friends of AMR.

Just email us to say if you wish to attend!

This is the [EVENTBRITE LINK TO REGISTER INTEREST](#).

A ZOOM link will then be provided to all who plan on attending.

*****PLEASE ONLY USE THE EMAILED LINK TO JOIN THE MEETING*****

The meeting will be private and so we will be grateful if you do not share the Zoom link when you receive it. Simply let us know if you have a friend who would be interested in registering and / or direct them to the Eventbrite listing.
